

Muting IC for portable CD players

BA3124F

The BA3124F is an IC developed for line output muting in portable CD players, and uses control pin switching to achieve line muting and to eliminate the dull thump that occurs when the power is turned on or off.

●Applications

Portable CD players, CD-ROM drives and other devices with line output.

●Features

- 1) Mute attenuation. (63dB)
- 2) ON and OFF control terminals.

●Absolute maximum ratings (Ta = 25°C)

| Parameter | Symbol | Limits | Unit |
|-----------------------|------------------|----------|------|
| Power supply voltage | V _{cc} | 9.0 | V |
| Power dissipation | P _d | 450* | mW |
| Operating temperature | T _{opr} | -15~+50 | °C |
| Storage temperature | T _{stg} | -55~+125 | °C |

* Reduced by 4.5 mW for each increase in Ta of 1°C over 25°C.

●Recommended operating conditions

| Parameter | Symbol | Limits | Unit |
|----------------------|-----------------|---------|------|
| Power supply voltage | V _{cc} | 1.8~7.0 | V |
