4-CH Bidirectional Low Capacitance ESD Protection Device with 15kV Contact and Ultra Low Clamping Voltage

Check for Samples: TPD4E101

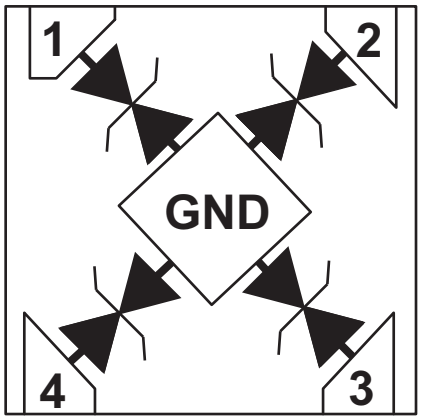
FEATURES

- **Provides System Level ESD Protection for Low-voltage IO Interface**
- **IEC 61000-4-2 Level 4**
  - **±15kV (Air discharge)**
  - **±15kV (Contact discharge)**
- **IEC 61000-4-5 (Surge): 3A (8/20 µs)**
- **IO Capacitance 4.8pF (Typ)**
- **$R_{DYNAMIC}$ 0.45Ω (Typ)**
- **DC Breakdown Voltage ±6V (Min)**
- **Ultra low Leakage Current 100nA (Max)**
- **10V Clamping Voltage (Max at Ipp = 1A)**
- **Industrial Temperature Range: –40°C to 125°C**
- **Space Saving DPW package (0.8mm x 0.8mm)**

APPLICATIONS

- **Cell Phones**
- **eBook**
- **Portable Media Players**
- **Digital Camera**
- **Tablet PC**
- **Set Top Box**

DEVICE CONFIGURATION



0.8 mm x 0.8mm DPW Package
(Bottom View)

DESCRIPTION

The TPD4E101 is a four channel ESD protection device in an ultra small DPW package. It is the industry's smallest 4-ch ESD protection device with 0.48mm pitch. This larger pitch helps save on PCB manufacturing costs. The device provides IEC61000-4-2 compliance up to 15kV contact discharge. It has an ESD clamp circuit with back-to-back diodes for bipolar/bidirectional signal support. The 7pF line capacitance is suitable for a wide range of applications supporting data rate up to 700Mbps.Typical application areas in portable applications are:

- Audio lines (Microphone, Earphone and Speakerphone)
- SD interface
- SIM interface
- Keypad or other buttons

ORDERING INFORMATION

T_A	PACKAGE(1)(2)		ORDERABLE PART NUMBER	TOP-SIDE MARKING
–40°C to 125°C	0.8mm x 0.8mm	Tape and reel	TPD4E101DPWR	A1

(1) Package drawings, thermal data, and symbolization are available at www.ti.com/packaging.
(2) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI Web site at www.ti.com.

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

ABSOLUTE MAXIMUM RATINGS

over operating free-air temperature range (unless otherwise noted)

	MIN	MAX	UNIT
Operating temperature range	–40	125	ºC
Storage temperature	–65	155	ºC
IEC 61000-4-2 Contact Discharge		±15	kV
IEC 61000-4-2 Air-gap Discharge		±15	kV
Peak Pulse Current (tp = 8/20 µs)		3	A
Peak Pulse Power (tp = 8/20 µs)		40	W

ELECTRICAL CHARACTERISTICS

T_A = –40°C to 125°C (unless otherwise specified)

PARAMETER		TEST CONDITION	MIN	TYP	MAX	UNIT
V_{RWM}	Reverse stand-off voltage				±5.5	V
I_{LEAK}	Leakage current	Pins = 5 V, GND = 0 V			100	nA
VClamp1,2	Clamp voltage with ESD strike on pin 1, pin 2 grounded	I_{PP} = 1 A, 8/20 µs(1)		10		V
		I_{PP} = 5 A, 8/20 µs(1)		13		V
VClamp2,1	Clamp voltage with ESD strike on pin 2, pin 1 grounded	I_{PP} = 1 A, 8/20 µs(1)		9		V
		I_{PP} = 5 A, 8/20 µs(1)		13		V
R_{DYN}	Dynamic resistance	Pins to GND(2)		0.45		Ω
		GND to Pins(2)		0.42		Ω
C_{IO}	IO Capacitance	V_{IO} = 2.5 V		4.8	7	pF
V_{BRF}	Break-down voltage, pin 1, 2, 3, or 4 to GND	I_{IO} = 1 mA	6			V
V_{BRR}	Break-down voltage, GND to pin 1, 2, 3, or 4	I_{IO} = 1 mA	6			V

(1) Non-repetitive current pulse 8/20 us exponentially decaying waveform according to IEC61000-4-5
(2) Extraction of RDYN using least squares fit of TLP characteristics between I=10A AND I=20A

REVISION HISTORY

Changes from Original (August 2012) to Revision A	Page
• Revised document to release full version of Datasheet.	1

PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish	MSL Peak Temp (3)	Op Temp (°C)	Top-Side Markings (4)	Samples
TPD4E101DPWR	ACTIVE	X2SON	DPW	4	3000	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	-40 to 125	A1	Samples

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

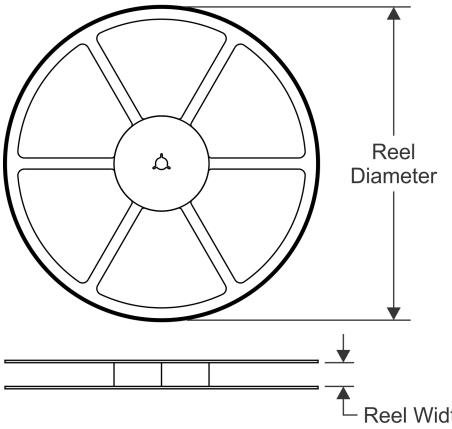
(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

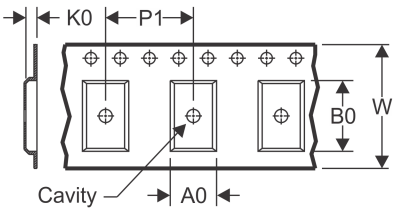
(4) Only one of markings shown within the brackets will appear on the physical device.

TAPE AND REEL INFORMATION

REEL DIMENSIONS

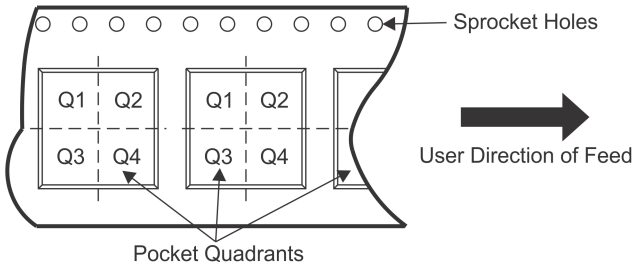


TAPE DIMENSIONS



A0	Dimension designed to accommodate the component width
B0	Dimension designed to accommodate the component length
K0	Dimension designed to accommodate the component thickness
W	Overall width of the carrier tape
P1	Pitch between successive cavity centers

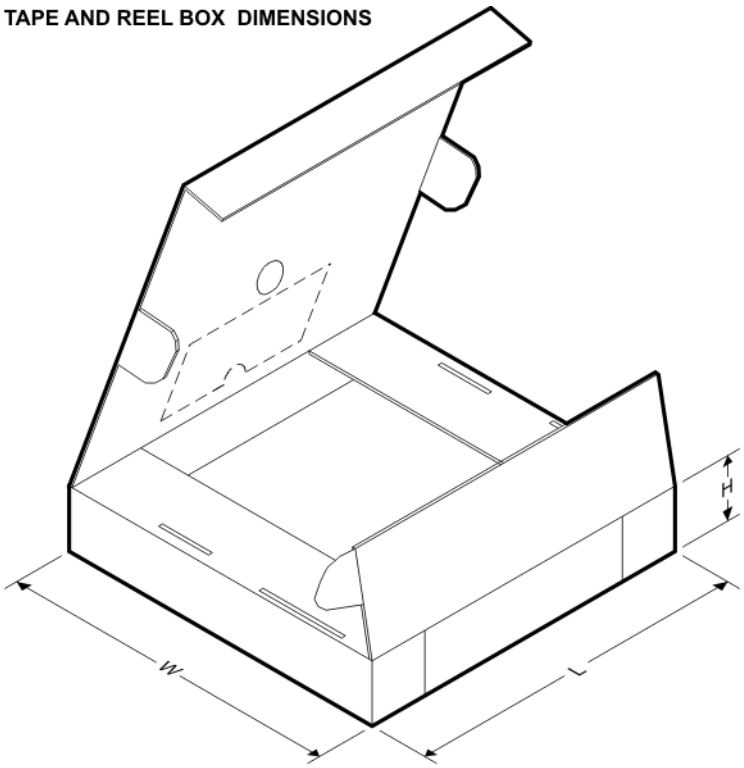
QUADRANT ASSIGNMENTS FOR PIN 1 ORIENTATION IN TAPE



*All dimensions are nominal

Device	Package Type	Package Drawing	Pins	SPQ	Reel Diameter (mm)	Reel Width W1 (mm)	A0 (mm)	B0 (mm)	K0 (mm)	P1 (mm)	W (mm)	Pin1 Quadrant
TPD4E101DPWR	X2SON	DPW	4	3000	180.0	9.5	0.91	0.91	0.5	4.0	8.0	Q2

TAPE AND REEL BOX DIMENSIONS



*All dimensions are nominal

Device	Package Type	Package Drawing	Pins	SPQ	Length (mm)	Width (mm)	Height (mm)
TPD4E101DPWR	X2SON	DPW	4	3000	180.0	180.0	30.0

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as “components”) are sold subject to TI’s terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI’s terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers’ products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers’ products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI’s goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or “enhanced plastic” are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have ***not*** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
